ABSTRACT TO MAIN TEXT

This interim report covers faculty for the 1978-1979 academic year. Each faculty member serving in a School of Public Health, who met the definition reproduced below, was asked to complete a standard form which requested basic characteristics information as of November 15, 1978. On completion of these forms a predesignated individual in each school collected the forms and forwarded them to the ASPH Data Center for processing. The Data Center coded the forms and forwarded them to the University of North Carolina Computer Center for keypunching and computer processing. Printouts were provided to the Data Center for development into data books and analysis of the information.

The total number of faculty completing a usable form was 1763, which provided an excellent response rate. The basic characteristics of faculty are: 71.9% male, 26.4% female, 1.7% unknown sex. Female faculty are 90.8% White, 4.3% Asian/Pacific Islander, 3% Black, 0.9% Hispanic, and 0.6% American Indian/Alaskan Native. Male faculty are 90.3% White, 5% Asian/Pacific Islander, 2.1% Black, 1.4% Hispanic, and 0.2% American Indian/Alaskan Native. The majority (73.4% of faculty are between the ages of 30 and 54 years. The median age is 43.74 years, the mean age is 44.80 years. More than half (56.9%) the faculty were appointed to the school where they are now teaching during the last seven years.

NOTE: Puerto Rico did not submit data on its faculty for the 1978-1979 school year. Because of this there will be some variation in data pertaining to Hispanics between 1977-1978 and 1978-1979.

Definition of Faculty Member = A person who holds an academic title or rank in the School of Public Health, has teaching and/or administrative responsibilities, and is paid in full or in part by the school.

> Full-time Faculty = A faculty member who is employed and paid by the School of Public Health for a minimum of eighty percent of the average working week.
>
> Part-time Faculty = A faculty member who is employed and paid by the School of Public Health for less than eighty percent of the average working week.

INTRODUCTION TO MAIN TEXT

The work of the Association of Schools of Public Health Data Center has involved more than four years of effort geared toward developing an accurate picture of the public health production system. Public health manpower has long been considered a national resource due to the multiplicity of people with different competencies that are the products of educational programs in the twenty schools. Identifying the range of competencies as well as the numbers and levels of persons pursuing various educational avenues in public health has been the work of the Data Center. It has long been recognized that decision makers among the leadership of the Schools of Public Health, the Federal Government, and the Congress require accurate and timely information on the public health educational system.

In 1961 James L. Troupin began collecting data for the American Public Health Association of students, graduates, and faculty of Schools of Public Health. But for reasons unknown to most people this effort lapsed after nine years, despite the increasing demand for data. The Data Center Collection Project began July 1, 1974 and has been successful in surpassing the output of the previous system. What was sought and accomplished has been a cooperative effort between the schools and the Association Headquarters' Office to produce and compile comparable data on applicants, students, graduates, and faculty of schools as well as on expenditures and research activities among the schools. This has required a formidable commitment of time and effort on the part of key persons among the schools. This effort has brought together administrative officers and other representatives of the public health education community including admissions, administration, financial, and teaching personnel with the goal of establishing a viable data production system. The result is the capability to provide timely information. Through fine tuning of the system it can serve as a clearinghouse for comprehensive review of the public health production system and the contribution of graduates in public health to improving the health of people.

The products of this effort have successfully served several groups carrying out programs, research, and investigations both within and outside the Schools of Public Health who require program specific data. Ad hoc requests from Educational Associations and Government units as well as persons within the schools have been served. Each of these requests has been met by discrete analysis of data offered by the University of North Carolina Computer Center, who is closely involved in the processing and assimilation of data produced by the schools. Several reports have been printed that reflect in the aggregate and by school the composition; educational objectives of students and graduates; demographic descriptions of applicants and faculty; reports detailing the growth, quantity and nature of research being conducted in schools; and reports describing the allocation of fiscal resources within individual schools. This effort of cooperation between the Schools of Public Health and the Data Center has already produced four complete sets of data (1974-1975, 1975-1976, 1976-1977, and 1977-1979) that go beyond the scope of any previous data.

MAIN TEXT

The purpose of this contract is to implement a data collection system among the Schools of Public Health which will obtain from the schools information on students, faculty, graduates, expenditures, research, organization, and activities which can be evaluated, analyzed, and disseminated as uniform, reliable, and valid information in the aggretate for all schools.

The principal tasks required under this purpose are to (a) plan a data collection system that is adaptable to each of the Schools of Public Health and yields data that can be aggregated uniformly, (b) develop an inexpensive yet accurate system for processing raw data produced by the schools, (c) develop a complete and accurate pattern of assembly and reporting of information gained through the system, (d) maintain close liaison with each school throughout the entire process, (e) consult with members of the Project Committee in group meetings and individually to consider changes in the system and approaches to problems which may affect the system.

There are essentially three phases that must be completed in obtaining information, processing data, and producing reports on applicants, students, newly graduating students, and faculty of Schools of Public Health. This report describes the phase concerned with faculty for 1978-1979.

At specified dates during the year each school issues standard forms to students and faculty on which data are to be collected. The schools receive the completed forms and verify the information requested. The completed forms are sent to the Data Center. Upon receipt, the Data Center staff codes the information for computer processing. The data processing staff at the University of North Carolina compiles the information, develops frequency distributions for evaluation as to completeness and accuracy, and generates printout tables requested by the Data Center. These printouts, once completed, are restructured by the Data Center staff, laid out for reproduction, printed, and put into book form for distribution to the Government and the schools. The time-table for this process as it was carried out for the 1978-1979 faculty data is:

Standard Data Forms on Hand at Schools	Data Due at Data Center	Tabulate and Report Completion Date
7/78	12/78	11/79

Work has progressed smoothly during this phase of the work and it is expected that the target date for completion will be met as well as the additional phases.

Characteristics of Faculty Serving in Schools of Public Health During 1978-1979

The response rate for all faculty is excellent this period. The basic characteristics of faculty are: 71.9% male, 26.4% female, 1.7% unknown sex. Female faculty are 90.8% White, 4.3% Asian/Pacific Islander, 3% Black, 0.9% Hispanic, and 0.6% American Indian/Alaskan Native. Male faculty are 90.3% White, 5% Asian/Pacific Islander, 2.1% Black, 1.4% Hispanic, and 0.2% American Indian/Alaskan Native. The majority of faculty are between the ages of 30 and 54 years. The median age is 43.74 years, the mean age is 44.80 years. More than half (56.9%) the faculty were appointed to the school where they now teach during the last seven years.

NOTE: Puerto Rico did not submit data on its faculty for the 1978-1979 school year. Because of this there will be some variation in data pertaining to Hispanics between 1977-1978 and 1978-1979.

Definition of Faculty Member = A person who holds an academic title or rank in the School of Public Health, has teaching and/or administrative responsibilities, and is paid in full or in part by the school.

Full-time Faculty = A faculty member who is employed and paid by the School of Public Health for a minimum of eighty percent of the average working week.

Part-time Faculty = A faculty member who is employed and paid by the School of Public Health for less than eighty percent of the average working week.

	0.3	0.1	4.7	2.3	1.3	89.8	1.5	100.0

All American Indians/Alaskan Natives except two were appointed since 1972. All Blacks except eleven were appointed since 1972; six were appointed between 1965-1969. Asians/Pacific Islanders had eleven appointed prior to 1965, 18 between 1965-1969, 52 since 1970, and two were unknown. Hispanics had three appointed prior to 1965, five between 1965-1969, and 15 since 1970. The distribution of years of appointment among Whites were about the same as for total faculty as mentioned in Table 3. NOTE: Data for Hispanics does not compare to 1977-1978 because Puerto Rico did not report for 1978-1979.

For more detailed tables see Addendum I, pages 34-40.

No Answer	193		568		268		636		
Unknown	98		98		98		98		
TOTAL	1763	547.05	1763	287.95	1763	607.80	1763	177.45	1620.25

Faculty members were asked, "What percentage of normal full-time effort do you spend in teaching, administration, research, and consultation and service?" Instructions stated that if the member was part-time the total percentages in the four areas should add up to the total of part-time effort. In processing the data it was decided that faculty indicating 80% or more effort would be classified as full-time. Those under 80% would be classified as part-time.

As may be noted in the above table, an FTE was calculated for each of the activity areas and added for a total FTE in each area. The "no answer" figures indicate the total of faculty members who did not record a percent of time for that particular activity. Unknown means that the faculty member did not answer any of the question. The FTE does not include the unknowns or "no answers."

For more detailed tables see Addendum I, pages 41-50.

TABLE 6. SEX BY FULL-TIME/PART-TIME STATUS

SEX	FULLTIME	PARTTIME	UNKNOWN	ROW TOTAL
MALE	1005	261	2	1268
	79.3	20.6	0.2	71.9
FEMALE	361	104	0	465
	77.6	22.4	0.0	26.4
UNKNOWN	22	7	1	30
	73.3	23.3	3.3	1.7
COLUMN TOTAL	1388	372	3	1763
	78.7	21.1	0.2	100.0

Male faculty have 79.3% who are full-time, while female faculty have 77.6%, a difference of 1.7%.

For more detailed tables see Addendum I, pages 26, 61-62.

TABLE 7. RACE BY FULL-TIME/PART-TIME STATUS

RACE	FULLTIME	PARTTIME	UNKNOWN	ROW TOTAL
AM IND ALASKAN	5	0	0	5
	100.0	0.0	0.0	0.3
HAWAIIAN	0	1	0	1
	0.0	100.0	0.0	0.1

As noted in the row totals the rank order for faculty in areas of specialization is:

Epidemiology - 13.3%
Environmental Health - 12.2%
Health Administration - 11.6%
Biostatistics - 11.1%
Biomedical Lab Sciences - 5.7%
Behavioral/Social Sciences - 5.3%
Nutrition - 4.5%
Maternal and Child Health - 4.2%
Health Education - 4%
Occupational Health - 3.9%
Other Areas - 3.7%
Population Studies - 3.5%
Health Policy - 2.1%
Mental Health - 2%
International Health - 1.9%
Hospital Administration - 1.6%
Health Planning - 1.4%
Public Health Nursing - 1.2%
Dental Public Health - 0.9%
Gerontology - 0.5%
Public Health Social Work - 0.2%
Unknown - 5.2%

The three areas of specialization in which each racial group has the largest percentages of faculty are shown below:

American Indian/Alaskan Native
Biostatistics - 20%
Health Administration - 20%
Nutrition - 20%

Asian/Pacific Islander
Biomedical Lab Sciences - 15.7%
Biostatistics - 14.5%
Environmental Health - 14.5%

Black
Public Health Education - 27.5%
Epidemiology - 12.5%

The rank order for areas of specialization in which faculty with joint appointments serve is the same as in Table 8. The five leading areas of specialization in which faculty have a joint appointment in other schools or departments of the University are:

Epidemiology - 14.7%

Health Administration - 13.1%

Environmental Health - 12.2%

Behavioral and Social Sciences - 6.3%

Biomedical Laboratory Sciences - 6.1%

Biostatistics - 6.1%

For more detailed tables see Addendum I, pages 54-56.

TABLE 11. SEX BY TITLES HELD IN SCHOOL OF PUBLIC HEALTH

	DEAN	ASSOC DEAN	ASSIST DEAN	DEPART CHAIRMN	PROF	ASSCC PROF	ASSIST PROF	INSTR	LECT OREB	RESRCH ASSOC	RESRCH ASSIST	OTHER TITLE	UN-KNOWN	# OF CASES
MALE	17	20	11	112	468	281	304	28	61	66	6	89	5	1268
FEMALE	1	4	7	8	39	74	149	45	45	60	7	70	0	465
UNKNOWN	0	0	0	1	9	5	5	0	1	0	0	2	9	30
TOTALS	18	24	18	121	516	360	458	73	107	126	13	161	14	1763

Each faculty member was asked to check the title(s) held from the list noted at the top of the above table. The 1763 faculty members who completed all or part of the form checked a total of 1834 titles as listed, 161 titles other than those listed, and 14 unknown titles. The difference between the known titles and total faculty responding is 71. If the other titles are included in the total titles, the total is 1995. A total of 1749 faculty answered the question, representing an average of 1.14 titles per faculty member.

Female faculty members held a total of 509 titles, including other, which is an average of 1.09 titles per person. The five leading titles for female faculty were: Assistant Professor - 32%, Associate Professor - 15.9%, Other - 15.1%, Research Associate - 12.9%, Instructor - 9.7%, Lecturer - 9.7%.
Male faculty members held a total of 1463 titles, including other, which is an average of 1.15 titles per person. The five leading titles for male faculty were: Professor - 36.9%, Assistant Professor - 24%, Associate Professor - 22.2%, Department Chairman - 8.8%, Other - 7%.

For more detailed tables see Addendum I, pages 63-74.

TABLE 12. RACE BY TITLES HELD IN SCHOOL OF PUBLIC HEALTH

	DEAN	ASSOC DEAN	ASSIST DEAN	DEPART CHAIRMN	PROF	ASSCC PROF	ASSIST PROF	INSTR	LECT OREB	RESRCH ASSOC	RESRCH ASSIST	OTHER TITLE	UN-KNOWN	# OF CASES
AMER. IND.	0	0	0	0	0	1	2	0	1	1	0	1	0	5

Each faculty member was asked to check from a list of 64 items the field in which he took his basic professional education. These 64 items were grouped into ten science areas which are the column headings in the above table. These items were cross-tabulated with the 21 areas of specialization to provide some insight into the professional background of faculty who were engaged in teaching or research. The areas of specialization are listed below in rank order along with the general field of education that has the highest percentage for that area:

Area of Specialization	Field of Education
Epidemiology	Health Sciences - 65.8%
Environmental Health	Environmental Sciences - 33.5%
Health Administration	Administration and Planning - 37.1%
Biostatistics	Math/Statistical Sciences - 88.3%
Biomedical Laboratory Sciences	Biological Sciences - 51.5%
Behavioral and Social Sciences	Behavioral and Social Sciences - 69.9%
Nutrition	Health Sciences - 62%
Maternal and Child Health	Health Sciences - 74.3%
Health Education	Education/Health Education - 61.4%
Occupational Health	Health/Environmental Sciences - 29%
Population Studies	Math/Statistical Sciences - 31.1%
Health Policy	Administration and Planning - 54.1%
Mental Health	Health/Behavioral and Social Sciences - 33.3%
International Health	Health Sciences - 61.8%
Hospital Administration	Administration and Planning - 72.4%
Health Planning	Health Sciences/Admin. and Planning - 29.2%
Public Health Nursing	Health Sciences - 90.5%
Dental Public Health	Health Sciences - 87.5%
Gerontology	Health/Behavioral and Social Sciences - 33.3%
Public Health Social Work	Behavioral and Social Sciences - 100%
Other	Health Sciences - 24.6%

The majority of faculty in eleven areas of specialization, including "Other," had Health Sciences as their primary professional background, four had Administration and Planning, two had Environmental Sciences, two had Math/Statistical Sciences, four had Social and Behavioral Sciences, one had Education/Health Education, and one had Biological Sciences.

For more detailed tables see Addendum I, pages 57-58.

With the question format the same as Table 13, each faculty member recorded his current area of work. The areas of specialization are listed below in rank order along with the current area of work that had the highest percentage in that area:

Area of Specialization	Current Area of Work
Epidemiology	Health Sciences - 67.5%
Environmental Health	Environmental Sciences - 54.4%
Health Administration	Administration and Planning - 63.4%
Biostatistics	Math/Statistical Sciences - 87.8%
Biomedical Laboratory Sciences	Biological Sciences - 63.4%
Behavioral and Social Sciences	Behavioral and Social Sciences - 51.6%
Nutrition	Health Sciences - 65.8%
Maternal and Child Health	Health Sciences - 37.8%
Health Education	Education/Health Education - 75.7%
Occupational Health	Environmental Sciences - 43.5%

Area of Specialization	Current Area of Work
Population Studies	Math/Statistical Sciences - 34.4%
Health Policy	Administration and Planning - 75.7%
Mental Health	Administration and Planning - 25%
International Health	Administration and Planning - 29.4%
Hospital Administration	Administration and Planning - 72.4%
Health Planning	Administration and Planning - 83.3%
Public Health Nursing	Health Sciences - 66.7%
Dental Public Health	Administration and Planning - 37.5%
Gerontology	Other - 66.7%
Public Health Social Work	Behavioral and Social Sciences - 66.7%
Other	Administration and Planning - 24.6%

The majority of faculty retained their basic field of education as their current area of work except for the following changes. International Health, Dental Public Health, and Other changed from a field of education in Health Sciences to a current area of work in Administration and Planning. This was also true of Mental Health and Health Planning except that these two areas had a tie for their basic field of education: Mental Health had a tie with Health Sciences and Behavioral and Social Sciences; Health Planning had a tie with Health Sciences and Administration and Planning. Gerontology shifted from a tie between Health Sciences and Behavioral and Social Sciences to Other. Occupational Health shifted from a tie between Health Sciences and Environmental Sciences to Environmental Sciences.

For more detailed tables see Addendum I, pages 59-60.

There is a total of 5146 degrees recorded for 1763 faculty, which is an average of 2.92 degrees per faculty member. If bachelor's degrees are deleted the total of advanced degrees for all faculty is 3460, which provides an average of 1.96 advanced degrees per faculty member. The average number of doctorate degrees, including MD and DDS, per faculty member is 0.98 and the average number of master's degrees per faculty member is 0.95. In non-administrative faculty Professors, Assistant Professors, and Associate Professors have a higher number of doctorates than other titles. Other than Professors, Assistant Professors, and Associate Professors, titles with the highest average of master's degrees are Research Associate, Lecturer, and Instructor.

For more detailed tables see Addendum I, page 25.

The order in which the areas of specialization rank is the same as in Table 8. Out of the 516 Professors, 60.5% concentrate most of their efforts in five areas: Epidemiology, Environmental Health, Health Administration, Biostatistics, Biomedical Laboratory Sciences. Associate Professors concentrate 58.3% of their time in the same areas as Professors and in the same order except Behavioral and Social Sciences replaces Biomedical Laboratory Sciences. Assistant Professors concentrate 55.2% of their time to the same areas as Professors with some changes in the order: Biostatistics, Health Administration, Environmental Health, Epidemiology, Biomedical Laboratory Sciences. More than two-thirds of the Instructors concentrate in Health Administration, Epidemiology, Maternal and Child Health, Public Health Nursing, Public Health Education, Environmental Health, Health Policy Analysis, Nutrition. Lesturers show 56.1% concentration in Health Administration, Environmental Health, Maternal and Child Health, Epidemiology, Occupational Health, and Biostatistics.

For more detailed tables see Addendum I, pages 76-97.

NAME OF RESPONDENT: _____
(Last) (First)

FACULTY STATISTICAL FORM

The information you provide will be used to develop statistics. Your individual responses will be kept confidential. Your care and attention to completing the form accurately will be greatly appreciated.

/2/8/ / / / / FOR OFFICE USE ONLY
1 2 3 4 5

/1/5/ SCHOOL: UNIVERSITY OF PUERTO RICO SCHOOL OF PUBLIC HEALTH
6 7

/ / 8

1. Sex: 1 ☐ Male 2 ☐ Female

/ / 9 10

2. Year of Birth: 1 9 [ ] [ ]

/ / 11

3. Race/ethnic:

Race/ethnic designations as used by the School of Public Health do not denote scientific definitions of anthropological origins. For purposes of this report, a faculty member may be included in the group to which he or she belongs or identifies with. (CHECK ONLY ONE GROUP.)

1 ☐ American Indian or Alaskan Native – A person having origins in any of the original peoples of North America.

2 ☐ Hawaiian – A person having origins in any of the original peoples of Hawaii.

3 ☐ Asian or Pacific Islander – A person having origins in any of the original peoples of the Far East, Southeast Asia or the Pacific Islands, excluding Hawaii. For example, this area includes China, Japan, Korea, the Philippine Islands and Samoa.

4 ☐ Black, not of Hispanic Origin – A person having origins in any of the Black racial groups.

5 ☐ Hispanic – A person of Mexican, Puerto Rican, Cuban or South American or other Spanish culture or origin, regardless of race.

6 ☐ White, not of Hispanic Origin – A person having origins in any of the original peoples of Europe, North Africa, the Middle East or the Indian Subcontinent.

4. Check each of the degrees that you have earned. (CHECK ALL THAT APPLY.)

/ / 12 ☐ None

/ / 13 ☐ Bachelors

/ / 14 ☐ Masters from a School of Public Health

/ / 15 ☐ Masters from a non-School of Public Health

/ / 16 ☐ Doctoral Degree from a School of Public Health

/ / 17 ☐ Doctoral Degree, other than M.D. or D.D.S., from a non-School of Public Health

/ / 18 ☐ M.D.

/ / 19 ☐ D.D.S.

/ / 20 ☐ Other

5. In what year were you first appointed to the faculty in this School of Public Health?

1 9 [ ] [ ] / / 21 22

6a. During the academic year are you employed by the School of Public Health full-time or part-time? / / 23

1 ☐ Full-time (Skip to 6c.)

2 ☐ Part-time (Answer 6b.)

6b. If you are part-time, what percent of time are you employed by the School of Public Health? / / 24 25

_____ PERCENT

6c. Of the time you spent (full-time or part-time) what was the percentage of time spent on the following activities in the School of Public Health? Part-time faculty should show the percentage commensurate with the amount of part-time employment. The item "consultation and service" should exclude any work which is not an official activity of the School of Public Health, and for which you are independently reimbursed.

PERCENT OF TIME	ACTIVITY	
_____	Teaching	/ / 26 27
_____	Administration	/ / 28 29
_____	Research	/ / 30 31
_____	Consultation and Service	/ / 32 33

1978-1979
FACULTY STATISTICAL FORM
EDITORIAL COMMENTS

ITEM NUMBER	ITEM TITLE	COLUMN(S)	COMMENTS
1	Sex	8	Code as given.
2	Year of Birth	9-10	Any birthdates in 1957 or later are to be coded "unknown" (99).
3	Race	11	Code multiple answers as "unknown" (9).
4	Prior Degrees	12-20	Code as given, If "none" was answered, code columns 13-20 as "not applicable" (7).
5	Year of First Appointment	21-22	Code as given.
6A	Full-time/Part-time Status	23	Code as given.
6B	Percent Part-time Effort	24-25	Code as given, except: "76" = 76% or 77% "77" = Not Applicable "98" = 98% or 99% "99" = Unknown
6C	Percentage Time to Activities	26-35	Code as given. 6A will be taken as "truth." 6B and 6C will agree with 6A -- If they don't, they will be coded "unknown" (99). An exception to this rule is the fact that full-time is defined as 80% or more. Thus, If "part-time" is checked in 6A but a percentage equal to or greater than 80% is written in 6B -- 6A will be edited to 1 = full-time. If 6A is answered 1 = full-time, 6B will be coded "not applicable" (77) regardless of what is written in 6B. 6C, columns 26-35, must sum to 80% or more; otherwise 6C will be coded "unknown" (99). If a total percent (columns 34-35) is not written but the percentages (columns 26-33) sum to 80% or more, fill in the total. Except for this case, all blank answers will be coded 01 = no answer. If 6A is answered 2 = part-time, 6B must be 79% or less. If 6B is 80% or more, edit 6A to 1 = full-time. Coding then follows rules for 6A = full-time. 6B will be coded as given as long as it is 79% or less. Round to nearest whole percent - 76 will be used to signify 76% or 77%. 6C, columns 26-33, must equal the amount listed in 6B or else all of 6C will be coded "unknown" (99). Note that if no total percent is listed in columns 34-35, but columns 26-33 do sum to the amount in 6B, the total will be edited to columns 34-35. Except in the case of a missing total percent, all blank answers will be coded 01 = no answer. If items 6A, 6B, and 6C are unanswered, code them "unknown" (9). If 6A is not answered and only one of 6B or 6C is answered, 6A will be edited to agree. If only 6B is answered, code 6A as 1 = full-time or 2 = part-time if 6B is 79% or less. 6C will be "unknown" (9). If only 6C is answered use the sum of the answers in columns 26-33 to code both 6A and 6B keeping in mind 80% or more = full-time. If 6A is unanswered and both 6B and 6C are answered - If 6B and 6C agree then code 6A full-time if the total is 80% or more and part-time if the total is 79% or less. If both 6B and 6C have been answered, but conflict, code 6A, 6B and 6C as "unknown" (9).
7	Titles Held	36-47	Code as given.
8A	Area of Specialization	48-49	Code multiple answers "unknown" (99). If there is no answer in 8A but there is only one box checked in 8B, edit 8A to agree. If there is no answer in 8A, but two or more boxes are checked in in 8B, code 8A as "unknown" (99) and 8B for the numbers specified. Edit out any inappropriate specified responses to 8A such as administration, student advising, etc. (These are not areas of specialization.)

ASPHDC-11/7/7o

1978-1979
FACULTY STATISTICAL FORM
EDITORIAL COMMENTS

ITEM NUMBER	ITEM TITLE	COLUMN(S)	COMMENTS
8A	Area of Specialization Continued	48-49	Edit back "other, specify" responses to major categories wherever possible (Appendix A).
8B	Number School of Public Health Departments Working in	50-51	Code as given (number of departments). If no response, code "unknown" (99). Always include the answer listed in 8A in answers to 8B. Edit when necessary.
9	Joint Appointment	52	Review items 10 and 11 before coding item 9. If item 9 is blank, but items 10 and 11 include answers other than "Public Health," edit item 9 to 1 = yes. If item 9 is blank, but "Public Health" has been specified in items 10 and 11, edit item 9 to 2 = no. If items 9, 10 and 11 are blank, code item 9 as "unknown." If item 9 is answerd 1 = yes and both items 10 and 11 are blank, item 9 remains 1 = yes. If item 9 is answered 1 = yes and items 10 and 11 have responses other than "Public Health" item 9 remains 1 = yes. If item 9 is answered 1 = yes, but only "Public Health" has been listed for items 10 and 11, edit item 9 to 2 = no. If item 9 is answered 2 = no and items 10 and 11 are answered with responses other than "Public Health" edit column 52 to 1 = yes. If item 9 is answered 2 = no and nothing is checked in items 10 and 11, item 9 will remain 2 = no.
10	Schools of Joint Appointment	53-63	If "School of Public Health" is specified for column 63, do not code it. If item 9 is 1 = yes, columns 53-63 will be coded 1 = answered or 9 = no answer or unknown. If item 9 is 2 = no, columns 53-63 will be coded 7 = not applicable. If item 9 is coded 9 = unknown, columns 53-63 will be 9 = unknown. Edit specifies back wherever possible (see Appendix B).
11	Primary Appointment	64-65	If item 9 is 1 = yes, then columns 64-65 will be coded as given. Any "other, specifies" that do not edit back to codes given on code sheet become "other." If item 9 is 2 = no, then columns 64-65 must be 77 = not applicable. If item 9 is 9 = no answer, then columns 64-65 must be 99 = no answer.
12A	Basic Professional Education	66-69	Code columns 66-67 with the major category of the profession checked under "A"; example - Health Sciences (1). Code columns 68-69 with the specific profession checked under "A." This is a two-column field (1 = 01, 2 = 02...9 = 09). If two specific professions are checked and they are in the same major category, code the major category in columns 66-67 code columns 68-69 as "multiple answers" (67). If two specific professions in different categories are checked, code columns 66-69 as 67 = multiple answer. Note that code 67 is to be used only when it is also used in columns 68-69. Code "other, specify" answers back wherever possible. If a specified answer cannot be edited into a specific category already listed, but does fit into a general category, code columns 66-67 with the general category and columns 68-69 with 66 = other.

ASPHDC-11/7/78
